

### **CANCER CENTER POSTDOC FUNDING**

The Cancer Center is requesting applications to fund two designated postdoc positions. The positions will be supported through internal funds (to replace the T32 program). Our goal is to generate strong trainee outcomes that put us in a solid position to re-apply for NCI T32 support. Please work with suitable candidates to put forward applications as per the attached application form. Note that applicants can be recruited into the program, they do not have to be at CSHL at time of application.

#### **What we offer**

- The funded postdocs are guaranteed two years financial support
- Extension into a third year of funding may be granted based on merit (e.g. if a fellowship is imminent)
- A personal Progress Committee that oversees scientific and career benchmarks over the three year training period

#### **Expectations and benchmarks**

- Application and securing of the postdocs' own fellowship funding within the 2-3 year support period
- Submission of manuscripts within the 3 year training period

#### **Requirements at time of application**

- The proposal must have a strong cancer research focus
- Candidates must have fewer than 3 years' postdoctoral experience, be U.S. citizens, noncitizen nationals, or permanent U.S. residents.
- New: Candidates can be recruited into the program, they do not have to be at CSHL at time of application.
- Shared mentoring is possible and required for junior PIs
- Have received a Ph.D., M.D., or comparable doctoral degree from an accredited domestic or foreign institution

The application instructions are on the attached Cover Form and materials should be returned to **Jessica Peluso (peluso@cshl.edu) by Friday, November 18th 5:00pm**. Questions can be directed to Jessica or Lloyd. The review committee is composed of CSHL Cancer Center Faculty and will decide on appointments in late November, with the appointments set to begin mid-December.
